Report on Review of Condensed Consolidated Interim Financial Information to the Board of Directors of Bank of Sharjah P.J.S.C.

Introduction

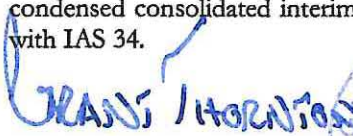

We have reviewed the accompanying condensed consolidated interim statement of financial position of Bank of Sharjah P.J.S.C. (the "Bank") and its subsidiaries (collectively referred to as the "Group") as of 30 September 2023 and the related condensed consolidated interim statement of profit or loss, condensed consolidated interim statement of comprehensive income for the three-month and nine-month periods then ended, and the condensed consolidated interim statement of changes in equity and the condensed consolidated interim statement of cash flows for the nine-month period then ended and explanatory notes. Management is responsible for the preparation and presentation of the condensed consolidated interim financial information in accordance with International Accounting Standard 34 – Interim Financial Reporting ("IAS 34"). Our responsibility is to express a conclusion on this condensed consolidated interim statement information based on our review.

Scope of Review

We conducted our review in accordance with the International Standards on Review Engagements 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity'. A review of condensed consolidated interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial information is not prepared, in all material respects, in accordance with IAS 34.

Notes to the condensed consolidated interim financial information for the nine-month period ended 30 September 2023 (unaudited)

1. General information

Bank of Sharjah P.J.S.C. (the "Bank"), is a public joint stock company incorporated by an Amiri Decree issued on 22 December 1973 by His Highness The Ruler of Sharjah and was registered in February 1993 under the Commercial Companies Law Number 8 of 1984 (as amended). The Bank commenced its operations under a banking license issued by the United Arab Emirates Central Bank dated 26 January 1974. The Bank is engaged in commercial and investment banking activities.

The Bank's registered office is located at Al Khan Road, P.O. Box 1394, Sharjah, United Arab Emirates. The Bank operates through eight branches in the United Arab Emirates located in the Emirates of Sharjah, Dubai, Abu Dhabi, and City of Al Ain. The accompanying condensed consolidated interim financial information combine the activities of the Bank and its subsidiaries (collectively the "Group"). These interim condensed consolidated financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting. They do not include all disclosures that would otherwise be required in a complete set of financial statements and should be read in conjunction with the prior year's annual report.

2. Basis of preparation

2.1 Subsidiary held for sale

The Central Bank of the UAE supports the Bank's strategic effort to delink/deconsolidate its Lebanese Subsidiary, as the underlying accounting anomalies impact is not sustainable for the Bank and pose a threat for even greater unnecessary volatility. Accordingly, the ultimate immediate objective was to cease the consolidation of the Lebanese Subsidiary financial statements in the Group's financial statements as per the Central Bank of the UAE recommendations effective 1 April 2023. This is required in order to avoid the unnecessary accounting anomalies and/or disruptions resulting from the consolidation of the Lebanese Subsidiary. On 22 June 2023, the board approved the de-linking.

When the Group classifies the Lebanese subsidiary as an "asset held for sale" involving loss of control and the sale is highly probable within 12 months, all the assets and liabilities of that subsidiary are classified as held for sale. Once classified in this category, the group of assets and liabilities are measured at the lower of carrying amount or fair value less costs to sell. If the group of assets and liabilities becomes impaired, an impairment loss is recognised in the condensed consolidated interim statement of profit and loss. Impairment losses may be reversed. The fair value less cost to sell estimate is a significant judgement and it is determined based on the market offer approach.

The breakdown of the Lebanese subsidiary's net assets as at 1 April 2023 is as follows:

ASSETS	AED'000
Cash and balances with central banks	2,892,460
Deposits and balances due from banks	10,497
Loans and advances, net	1,090,017
Investments measured at fair value	29,567
Investments measured at amortised cost	43,344

**Notes to the condensed consolidated interim financial information
for the nine-month period ended 30 September 2023 (unaudited)****2. Basis of preparation (continued)****2.2 Basis of preparation**

The accounting policies used in the preparation of this condensed consolidated interim financial information is consistent with those used in the audited annual consolidated financial statements for the year ended 31 December 2022. This condensed consolidated interim financial information does not include all the information and disclosures required in full consolidated financial statements and should be read in conjunction with the Group's consolidated financial statements for the year ended 31 December 2022. In addition, results for the period from 1 January 2023 to 30 September 2023 are not necessarily indicative of the results that may be expected for the financial year ending 31 December 2023.

As required by the Securities and Commodities Authority of the U.A.E. ("SCA") Notification No. 2624/2008 dated 12 October 2008, accounting policies relating to financial assets, cash and cash equivalents, Islamic financing and investing assets and investment properties have been disclosed in the condensed consolidated interim financial information.

Basis of measurement - The condensed consolidated interim financial information has been prepared on the historical cost basis except for certain financial instruments and investment properties that are measured at fair values as explained in the accounting policies below.

Functional and presentation currency - The condensed consolidated interim financial information is presented in Arab Emirates Dirham (AED) and all values are rounded to the nearest thousands' dirham, except when otherwise indicated.

Basis of consolidation - This condensed consolidated interim financial information incorporates the condensed interim financial information of the Bank and entities controlled by the Bank. Control is achieved when the Bank has:

- power over the investee,
- exposure, or has rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

The condensed consolidated interim financial information comprises the financial statements of the Bank and of the following subsidiaries. The financial statements of the subsidiaries are prepared for the same reporting period as that of the Bank, using consistent accounting policies.

All intragroup assets, liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group are eliminated in full on consolidation.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries.

Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid/payable or received/receivable is recognised directly in equity and attributed to owners of the Group.

3. Application of other new and revised International Financial Reporting Standards ("IFRS")

3.1 New and revised IFRSs applied with no material effect on the condensed consolidated interim financial information

The following are the new and revised IFRS, which became effective for annual periods beginning on or after 1 January 2023, have been adopted in this interim financial information. The application of these revised IFRSs, except where stated, have not had any material impact on the amounts reported for the current and prior periods.

Narrow-scope amendments to IFRS 3, IAS 16, IAS 17 and some annual improvements on IFRS 9 and IFRS 16

Amendments to IFRS 3, 'Business combinations' update a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations; Amendments to IAS 16, 'Property, plant and equipment' prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company will recognise such sales proceeds and related cost in profit or loss; Amendments to IAS 37, 'Provisions, contingent liabilities and contingent assets' specify which costs a company includes when assessing whether a contract will be lossmaking; and annual improvements make minor amendments to IFRS 9, 'Financial instruments', and the Illustrative Examples accompanying IFRS 16, 'Leases'.

**Notes to the condensed consolidated interim financial information
for the nine-month period ended 30 September 2023 (unaudited)****3. Application of other new and revised International Financial Reporting Standards ("IFRS")
(continued)****3.2 New and revised IFRS in issue but not yet effective (continued)**

Amendments to IAS 1, Presentation of financial statements on classification of liabilities - These narrow-scope amendments to IAS 1, 'Presentation of financial statements', clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date (for example, the receipt of a waiver or a breach of covenant). The amendment also clarifies what IAS 1 means when it refers to the 'settlement' of a liability - Deferred until accounting periods starting not earlier than 1 January 2024.

Amendment to IAS 12 – deferred tax related to assets and liabilities arising from a single transaction - These amendments require companies to recognize deferred tax on transactions that, on initial recognition give rise to equal amounts of taxable and deductible temporary differences - Effective for annual periods beginning on or after 1 January 2023.

Amendments to IAS 1, 'Presentation of financial statements' IFRS Practice statement 2 and IAS 8, 'Accounting policies, changes in accounting estimates and errors' - The IASB amended IAS 1, 'Presentation of Financial Statements', to require companies to disclose their material accounting policy information rather than their significant accounting policies. The amendment also clarifies that accounting policy information is expected to be material if, without it, the users of the financial statements would be unable to understand other material information in the financial statements. Further, the amendment to IAS 1 clarifies that immaterial accounting policy information need not be disclosed. However, if it is disclosed, it should not obscure material accounting policy information. To support this amendment, the Board also amended IFRS Practice Statement 2, 'Making Materiality Judgements', to provide guidance on how to apply the concept of materiality to accounting policy disclosures. The amendment to IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', clarifies how companies should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, but changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period - Effective for annual periods beginning on or after 1 January 2023.

The Group is currently assessing the impact of these standards, interpretations and amendments on the future financial statements and intends to adopt these, if applicable, when they become effective.

4. Financial risk management

The Group's financial risk management objectives and policies are consistent with those disclosed in the consolidated financial statements as at and for the year ended 31 December 2022.

5 Financial instruments**5.1 Recognition and Initial Measurement**

A financial instrument is any contract that gives rise to both a financial asset for the Group and a financial liability or equity instrument for another party or vice versa. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. Recognised financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities respectively, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in consolidated statement of profit or loss.

**Notes to the condensed consolidated interim financial information
for the nine-month period ended 30 September 2023 (unaudited)****5 Financial instruments (continued)****5.2 Classification of financial assets**

Balances with central banks, due from banks and financial institutions, financial assets and certain items in receivables and other assets that meet the following conditions are subsequently measured at amortised cost less impairment loss and deferred income, if any (except for those assets that are designated as at fair value through profit or loss on initial recognition). IFRS 9 contains three principal classification categories for financial assets: measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis. In addition, on initial recognition the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets measured at amortised cost

The effective interest rate method is a method of calculating the amortised cost of those financial instruments measured at amortised cost and of allocating income over the relevant period. The effective interest rate is the rate that is used to calculate the present value of the estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial instruments, or, where appropriate, a shorter period, to arrive at the net carrying amount on initial recognition. Income is recognised in the consolidated statement of profit or loss on an effective interest rate basis for financing and investing instruments measured subsequently at amortised cost.

Financial assets measured at FVTPL

Investments in equity instruments are classified as financial assets measured at FVTPL, unless the Group designates fair value through other comprehensive income (FVTOCI) at initial recognition. Financial assets that do not meet the amortised cost criteria described above, or that meet the criteria but the Group has chosen to designate it as at FVTPL at initial recognition, are measured at FVTPL. Financial assets (other than equity instruments) may be designated at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains or losses on them on different basis.

Financial assets are reclassified from amortised cost to FVTPL when the business model is changed such that the amortised cost criteria are no longer met. Reclassification of financial assets (other than equity instruments) designated as at FVTPL at initial recognition is not permitted.

Financial assets measured at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in the consolidated statement of profit or loss at the end of each reporting period. The net gain or loss recognised in the consolidated statement of profit or loss.

**Notes to the condensed consolidated interim financial information
for the nine-month period ended 30 September 2023 (unaudited)****5 Financial instruments (continued)****5.2 Classification of financial assets (continued)****Financial assets measured at FVTOCI**

On initial recognition, the Group can make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading. A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term;
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments fair value reserve. Where the asset is disposed of, the cumulative gain or loss previously accumulated in the investments fair value reserve is not transferred to consolidated statement of profit or loss.

5.3 Measurement of ECL

Credit loss allowances are measured using a three-stage approach based on the extent of credit deterioration since origination:

- Stage 1 – Where there has not been a significant increase in credit risk (SICR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to remaining term to maturity is used.
- Stage 2 – When a financial instrument experiences a SICR subsequent to origination but is not considered to be in default, it is included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
- Stage 3 – Financial instruments that are considered to be in default are included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

ECLs are an unbiased probability-weighted estimate of the present value of credit losses that is determined by evaluating a range of possible outcomes. For funded exposures, ECL is measured as follows:

- for financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive arising from the weighting of multiple future economic scenarios, discounted at the asset's effective interest rate (EIR);
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows.

However, for unfunded exposures, ECL is measured as follows:

For undrawn loan commitments, as the present value of the difference between the contractual cash flows that are due to the Group if the holder of the commitment draws down the loan and the cash flows that the Group expects to receive if the loan is drawn down; and for financial guarantee contracts, the expected payments to reimburse the holder of the guaranteed debt instrument less any amounts that the Group expects to receive from the holder, the debtor or any other party.

**Notes to the condensed consolidated interim financial information
for the nine-month period ended 30 September 2023 (unaudited)****5 Financial instruments (continued)****5.3 Measurement of ECL (continued)**

The Group measures ECL on an individual basis, or on a collective basis for portfolios of loans that share similar economic and credit risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measured on an individual basis or a collective basis.

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD)
- loss given default (LGD)
- exposure at default (EAD)

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information.

Assessment of significant increase in credit risk

The assessment of a significant increase in credit risk is done on a relative basis. To assess whether the credit risk on a financial asset has increased significantly since origination, the Group compares the risk of default occurring over the expected life of the financial asset at the reporting date to the corresponding risk of default at origination, using key risk indicators that are used in the Group's existing risk management processes. At each reporting date, the assessment of a change in credit risk will be individually assessed for those considered individually significant. This assessment is symmetrical in nature, allowing credit risk of financial assets to move back to Stage 1, if certain criteria are met, if the increase in credit risk since origination has reduced and is no longer deemed to be significant.

The Group assesses whether credit risk has increased significantly since initial recognition at each reporting date. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument and the borrower, and the geographical region. What is considered significant differs for different types of lending, in particular between wholesale and retail.

The Group monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due;
- the average time between the identification of a significant increase in credit risk and default appears reasonable;
- exposures are not generally transferred directly from 12-month ECL measurement to credit impaired; and
- there is no unwarranted volatility in loss allowance from transfers between 12-month PD [stage 1] and lifetime PD [stage 2].

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- The remaining lifetime probability of default (PD) as at the reporting date; with
- The remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations)

5 Financial instruments (continued)

5.3 Measurement of ECL (continued)

Assessment of significant increase in credit risk (continued)

The Group uses three criteria for determining whether there has been a significant increase in credit risk:

- quantitative test based on movement in PD;
- quantitative indicators
- a backstop of 30 days past due.

Improvement in credit risk profile

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL. The Group has defined below criteria in accordance with regulatory guidelines to assess any improvement in the credit risk profile which will result into upgrading of customers moving from Stage 3 to Stage 2 and from Stage 2 to Stage 1.

- Significant decrease in credit risk will be upgraded stage-wise (one stage at a time) from Stage 3 to Stage 2 after and from Stage 2 to Stage 1 after meeting the curing period of at least 12 months.
- Restructured cases will be upgraded if repayments of 3 instalments (for quarterly instalments) have been made or 12 months (for instalments longer than quarterly) curing period is met.

Definition of default

The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full without recourse by the Bank to actions such as realising security (if any is held);
- the borrower is past due more than 90 days on any material credit obligation to the Bank; or
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding.

In assessing whether a borrower is in default, the Bank considers indicators that are:

- qualitative - e.g. breaches of covenant;
- quantitative - e.g. overdue status and non-payment on another obligation of the same issuer to the Bank; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:

- financial assets measured at amortised cost: (as a deduction from the gross carrying amount of the assets);
- where a financial instrument includes both a drawn and an undrawn component, and the Group cannot identify the ECL on the loan commitment component separately from those on the drawn component: The Group presents a combined loss allowance for both components. The combined amount is presented as deduction from the gross carrying amount of the drawn component.
- debt instruments measured at FVOCI: no loss allowance is recognised in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is disclosed and is recognised in the statement of profit or loss.

**Notes to the condensed consolidated interim financial information
for the nine-month period ended 30 September 2023 (unaudited)****5. Financial instruments (continued)****5.4 Financial liabilities**

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'amortised cost'. The Group initially recognises financial liabilities such as deposits and debt securities issued on the date at which they are originated. All other financial liabilities (including liabilities designated at fair value through profit or loss) are initially recognised on the trade date at which the Group becomes party to the contractual provision of the instrument.

Financial liabilities at FVTPL

Financial liabilities are classified at FVTPL where the financial liability is either held for trading or it is designated at FVTPL and measured at fair value. Determination is made at initial recognition and is not reassessed. Financial liabilities at FVTPL are stated at fair value, with any gains / losses arising on remeasurement recognised in profit or loss to the extent that they are not part of a designated hedging relationship. The net gain/ loss recognised in consolidated statement of profit or loss incorporates any interest paid on the financial liability. However, for non-derivative financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in OCI, unless the recognition of the effects of changes in the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in OCI are not subsequently reclassified to consolidated statement of profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability. In making the determination of whether recognising changes in the liability's credit risk in OCI will create or enlarge an accounting mismatch in profit or loss, the Group assesses whether it expects that the effects of changes in the liability's credit risk will be offset in profit or loss by a change in the fair value of another financial instrument measured at FVTPL. This determination is made at initial recognition.

The Group has designated certain financial liabilities as at FVTPL in either of the following circumstances:

- the liabilities are managed, evaluated and reported internally on a fair value basis; or
- the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial liabilities at amortized cost

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis. The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period.

De-recognition of financial liabilities

Financial liabilities are derecognised when they are extinguished - that is when the obligation specified in the contract is discharged, cancelled or expired.

5.5 Estimates and judgements

The preparation of condensed consolidated financial information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense.

Actual results may differ from these estimates. In preparing this condensed consolidated financial information, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that were applied to the audited consolidated financial statements as at and for the year ended 31 December 2022.

5. Financial instruments (continued)

5.6 Investment properties

Investment properties are held to earn rental income and/or capital appreciation. Investment properties include cost of initial purchase, developments transferred from property under development, subsequent cost of development, and fair value adjustments. Investment properties are reported at valuation based on fair value at the end of the reporting period. The fair value is determined on a periodic basis by independent professional valuers.

Fair value adjustments on investment property are included in the consolidated statement of profit or loss in the period in which these gains or losses arise. Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the consolidated statement of profit or loss in the period of derecognition. Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

6. Cash and balances with central banks

Profit/ (loss) available to the owners of the Bank (AED'000)	21,839	(86,018)	(121,412)	(281,350)
<i>Weighted average number of ordinary shares:</i>				
Ordinary shares at the beginning of the period	3,000,000	2,200,000	2,200,000	2,200,000
Weighted average number of shares outstanding during the period (in thousands share)	3,000,000	2,200,000	2,485,294	2,200,000
Basic profit/ (loss) per share (AED)	0.007	(0.039)	(0.049)	(0.128)

As at 30 September 2023 and 30 September 2022, there were no potential dilutive shares outstanding.

The AGM held on 4 May 2023 approved the increase of the Bank's capital by issuing 800 million shares at the value of one-dirham (1) per share, at an issuance price of one-dirham (1) per share, at a total issuance amount of AED 800 million in favour of the Government of Sharjah represented by Sharjah Asset Management as a strategic shareholder, which raises its shareholding in the Bank from 17.16% to about 40% so that capital aggregates to AED 3 Billion.

20. Segmental information

Operating segments are identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance.

For operating purposes, the Group is organised into two major business segments:

- (i) Commercial Banking, which principally provides loans and other credit facilities, deposits and current accounts for corporate, government, institutional and individual customers; and
- (ii) Investment Banking, which involves the management of the Group's investment portfolio.

These segments are the basis on which the Group reports its segment information. Transactions between segments are conducted at rates determined by management, taking into consideration the cost of funds and an equitable allocation of expenses.

The following table presents information regarding the Group's operating segments:

	Commercial Banking AED'000	Investment Banking AED'000	Unallocated AED'000	Total AED'000

Revenue reported above represents revenue generated from external customers. There were no inter-segment sales in the period (30 September 2022: Nil). Transactions between segments, inter-segment cost of funds and allocation of expenses are not determined by management for the purpose of resource allocation. The accounting policies of the reportable segments are the same as the Group's accounting policies as disclosed in the consolidated financial statements for the year ended 31 December 2022. For the purposes of monitoring segment performance and allocating resources between segments:

- All assets are allocated to reportable segments except for property and equipment, goodwill and other intangibles and certain amounts included in other assets; and
- All liabilities are allocated to reportable segments except for certain amounts included in other liabilities.

Geographical information

The Group operates in two principal geographical areas - United Arab Emirates (country of domicile) and Lebanon (referred to as 'foreign'). The Group's revenue from external customers by geographical location are detailed below:

21. Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, differences can arise between book values and the fair value estimates. Underlying the definition of fair value is the presumption that the Group is a going concern without any intention or requirement to materially curtail the scale of its operation or to undertake a transaction on adverse terms.

Investments held at fair value through profit and loss - Investments held for trading or designated at fair value through profit and loss represent investment securities that present the Group with opportunity for returns through dividend income, trading gains and capital appreciation. Including in these investments listed equity securities for which the fair values are based on quoted prices at close of business as of 30 September 2023, and unlisted bonds for which the fair values are derived from internal valuation performed based on generally accepted pricing models, all inputs used for the valuation are supposed by observable market prices or rates.

Unquoted investments held at fair value through other comprehensive income - The condensed consolidated interim financial information includes holdings in unquoted securities amounting to AED 142 million (31 December 2022: AED 157 million) which are measured at fair value. Fair values are determined in accordance with generally accepted pricing models based on comparable ratios backed by discounted cash flow analysis depending on the investment and industry. The valuation model includes some assumptions that are not supported by observable market prices or rates.

For investments valued using comparable ratios, share prices of comparable companies represent significant inputs to the valuation model. If the share prices of the comparable companies were 5% higher/lower while all other variables were held constant, then the fair value of the securities would increase/decrease by AED 7 million (31 December 2022: AED 8 million). The impact of the change in fair valuation from previously existing carrying amounts have been recognised as a part of cumulative changes in fair value in equity.

Fair value of financial instruments carried at amortised cost - Except as detailed in the following table, the management considers that the carrying amounts of financial assets and financial liabilities measured at amortised cost in the condensed consolidated interim financial information approximates their fair values.

		30 September 2023		31 December 2022	
	Level	Carrying amount AED'000	Fair value AED'000	Carrying amount AED'000	Fair value AED'000
Financial assets					
- Investments measured at amortised cost	3	7,285,450	7,280,056	7,335,160	7,377,598
- Loans and advances	3	22,079,747	22,079,747	21,623,267	21,623,267
Financial liabilities					
- Customers' deposits	2	25,545,583	25,545,583	25,281,131	25,281,131
- Issued Bonds	2	4,416,149	4,424,073	3,059,421	2,943,778

The fair value for other financial assets measured at amortized cost is based on market prices.

21. Fair value of financial instruments (continued)

Fair value measurements recognised in the condensed consolidated interim statement of financial position

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value. They are ranked into levels 1 to 3 based on the degree to which the fair value is observable.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices, including over-the-counter quoted prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

21. Fair value of financial instruments (continued)

Reconciliation of Level 3 fair value measurements of other financial assets measured at fair value:

	30 September 2023 AED'000	31 December 2022 AED'000

Other movements	(14,671)	(14,534)
Closing balance	<u>142,320</u>	<u>157,058</u>

22. Capital adequacy

Basel III

The capital adequacy ratios are computed based on circulars issued by the Central Bank of UAE and based on a specific exception received from the Central Bank of the UAE considering the currency translation reserve resulting from the change in the Lebanese official rate from LBP 1507.5 to LBP 15,000 on 28 February 2023. The Group has complied with all the externally imposed capital requirements.

	Basel III 30 September 2023 AED'000 (unaudited)	31 December 2022 AED'000 (audited)
Capital base		
Tier 1 capital	3,912,860	3,247,735
Tier 2 capital	327,490	371,057
Total capital base	<u>4,240,350</u>	<u>3,618,792</u>
Risk-weighted assets:		
Credit risk	26,199,230	29,684,588
Market risk	298,052	336,096
Operational risk	1,407,793	1,407,793
Total risk-weighted assets	<u>27,905,075</u>	<u>31,428,477</u>
Capital ratios

Tier 1 capital ratio	14.02%	10.33%
Total capital ratio	<u>15.20%</u>	<u>11.51%</u>

Have the Group included the impact of the currency translation reserve resulting from the change in the Lebanese official rate from LBP 1507.5 to LBP 15,000 for the purpose of computing capital adequacy ratios, the common equity Tier 1, Tier 1 capital and total capital ratios would have dropped to 12.64%, 12.64% and 13.81% respectively.

Notes to the condensed consolidated interim financial information for the nine-month period ended 30 September 2023 (unaudited)

24. Corporate tax

On 9 December 2022, the UAE Ministry of Finance released Federal Decree-Law No. 47 of 2022 on the Taxation of Corporations and Businesses (Corporate Tax Law or the Law) to enact a Federal corporate tax (CT) regime in the UAE. The CT regime is effective from 1 June 2023 and accordingly, it has an income tax related impact on the financial statements for accounting periods beginning on or after 1 June 2023.

The Cabinet of Ministers Decision No. 116 of 2022 specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted from the perspective of IAS 12 - Income Taxes. A rate of 9% will apply to taxable income exceeding AED 375,000 and a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

The Group will be subject to taxation commencing 1 January 2024.

25. Seasonality of results

No income of a seasonal nature was recorded in the condensed consolidated interim statement of profit or loss for the nine-month period ended 30 September 2023 and 30 September 2022.

26. Subsequent events

There are no material subsequent events have occurred that require adjustment to, or disclosure in, the interim financial statements.
